

## Aspects of Youth Guidance

With a focus on young adults with special needs, this volume asks vital questions about the journey and development of every individual making the transition from adolescence to adulthood. Through independent research supported by the Camphill Soltane Youth Guidance seminar, the authors of these articles make an important contribution toward understanding key developmental milestones in the life of the young individual. In many respects, this book can serve as a textbook contribution for educators, students of anthropology, curative educators, social therapists, or parents that can illuminate a fundamental approach to healing. This is a healing that belongs to the Camphill way of life.
