

## Food Chains and Webs (Life Processes)

Did you know that all food chains start with a green plant? Discover how plants and animals in a particular habitat are linked together by what they eat. Explore the fascinating world of living things, including the processes that keep animals and plants alive, and how people study them. Fact boxes that introduce the most amazing plants and animals are featured in this book along with colorful photographs that show the incredible diversity of life. This book includes a glossary and resources for further research.
