

# Geometry and Quantization of Moduli Spaces (Advanced Courses in Mathematics - CRM Barcelona)

This volume is based on four advanced courses held at the Centre de Recerca Matemàtica (CRM), Barcelona. It presents both background information and recent developments on selected topics that are experiencing extraordinary growth within the broad research area of geometry and quantization of moduli spaces. The lectures focus on the geometry of moduli spaces which are mostly associated to compact Riemann surfaces and are presented both from classical and quantum perspectives.
