

Tiger: Habitats, Life Cycles, Food Chains, Threats (Natural World)

Follow a Bengal tiger as it takes its first steps through life in the forests of India. Discover how the tigress teaches her cubs to stalk, kill and eat their prey; join the cubs as they grow up and find their own territories and find out about the threats facing tigers and what can be done to protect them. This book is one of a series, which explores the lives of some of the world's wild animals through their life cycles, natural habitats, food chains and the threats that they face daily. It is endorsed by the Worldwide Fund for Nature.
