

The Great Reflation: How Investors Can Profit From the New World of Money

A guide to understanding and thriving in today's new economic environment. Now that the housing and credit bubbles have burst, toppling banks and sending shockwaves through the stock market and around the world, it may seem like the worst has passed. But the full impact of the crises we have recently faced will create far more problems, and unless you're prepared, you'll struggle to regain your financial footing. In *The Great Reflation*, author Tony Boeckh helps you understand how these crises, and the policies passed to jumpstart the economy, will play out for investments and business, and provides you with the tools to excel in today's rapidly evolving financial landscape. He reveals how similar episodes compare with the current crises and what this could mean for your financial future. Arms you with practical insights that will allow you to evaluate different investment options. Explores the implications of the end of the private debt cycle, the possible rise of a new age of thrift, and the new government debt crisis. Reveals how you can profit from once-in-a-lifetime opportunities as well as proper portfolio allocation strategies. While things may never return to normal, you can still make choices that will allow you to prosper. This book will show you how.
