

Urban water supply system(Chinese Edition)

Paperback. Pub Date: 2012. Pages: 268
Language: Chinese in Publisher: China Building Industry Press
city water distribution network is the urban water supply network system planning, design, operation and management of the theoretical writings, including Introduction the planning and design of water supply engineering, pressure tube fluid dynamics based water distribution network hydraulic calculation, the pump system hydraulic analysis, hydraulic transient analysis based on feedwater piping materials and accessories, to changes in water quality of the water supply network, water storage facilities, computer models, model checking of the water supply network, water supply network monitoring and control technologies, maintenance and repair, and leakage control technology, water supply system security Chapter 15. A more detailed exposition of the city water distribution network...
